

# Equipower™ - An Electrical fire safety product

A comprehensive power protection for your home/ office

Whenever a building/ premise is designed , all safety factors are considered from worst case point of view, except for voltage . Voltage is left to equipments capacity to handle over voltage.

There are fires caused by incidents like **neutral open and double phasing incidents**, for which there is no formidable solution. The incident occurs very rarely however when it does it causes huge financial losses due to damages to critical equipments

**Equipower™** is comprehensive power protection device which acts as an insurance against power fluctuation that could damage your electrical appliances and electronic devices used in your homes and offices .

**Equipower™** protects your electrical appliances and electronic devices against high voltage, low voltage, surges, spikes. However what sets it apart from other protection devices is the **ability to protect your equipment in case of neutral open condition**. It can easily protect your equipment from voltage as high as **440V in single phase**. **Equipower™** increases longevity of equipments and minimizes the risk of damage.

FEATURES	Equipower™	SPD	Stabilizer	UPS	Isolation transformer
<b>Neutral open protection</b>	Yes	No	No	No	yes
<b>Double phasing protection</b>	Yes	No	No	No	No
<b>Lightning protection *</b>	Yes	Yes	No	No	No
Single phasing protection	Yes	No	yes	No	No
Phase reversal protection.	yes	No	No	No	No
Over voltage and under voltage protection	yes	No	yes	yes	No
